

With over 5000 Devices in our Interop Library, Novus Labs ensures seamless connectivity and compatibility between devices in a wide range of user scenarios and deployments both in controlled lab and real-world environments.

THE NOVUS DIFFERENCE

From basic to more complex interoperability scenarios, we have experience creating application and device-specific test cases leveraging our extensive inventory.

- Power consumption
- Longevity
- Industrial design
- Ambient environment
- Out-of-box
- Co-existence
- Network routing/shaping
- Custom solutions
